

New Industrial City Jordan

- 01 Masterplan Visualization
- 02 Residential Node
- 03 Command Centre

The Masterplan for the new Economic Free Zone in Jordan. The project sees the creation of a Dry Port, Freight Airport, Road Intersection and Railway to allow manufacturing and export across the globe from this uniquely positioned Smart City. The masterplan is made up of a new infrastructure network supporting varying sizes of industrial and technology plots, with a mix of key activities and processes.

The whole area is tied together by a green landscaped corridor with facility nodes at key points containing residential accommodation, mosques, community buildings and leisure facilities.
